APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to all existing rights on the source. A substantial headgate and measuring device must be installed and maintained to facilitate the measurement and control of water. The State retains the right to regulate the use of the water herein granted at any and all times.

This Permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

This permit is subject to the condition that the permittee must ensure that wildlife which have customarily used such water will have access thereto, NRS.533.367.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The total combined duty of water under Permits 34708 and 34709 shall not exceed 320 acre-feet annually.

This permit is approved subject to the State Engineer's Ruling #2712 dated September 3, 1981 and the Springs shall be captured and diverted as per engineering drawings submitted by the applicant on April 16, 1982. No casing on collector pipe shall penetrate the clay layer on which the water is perched. No water shall be captured or collected from a depth greater than 10 feet from the ground surface.

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 0.25 cubic feet per second, but not to exceed a yearly duty of 4.0 acre-feet per acre of land irrigated from any and/or all sources.

Actual construction work shall begin on or before.....

Proof of commencement of work shall be filed before.....

Work must be prosecuted with reasonable diligence and be completed on or before..... October 22, 1989

Proof of completion of work shall be filed before..... November 22, 1989
